Now a word of explanation on why and how the "Hungate Volume Index" was written.

Each time I became acquainted with a new "Hungate" I was always curious as to which lineage he or she came from. After acquiring a complete set of volumes in early 1987, I began updating (marking corrections in ink) using the ERRATA as originally established by Dr.Carroll and subsequently added to various journals through the years. Once this task was accomplished, I went to my trusty Commodore C64 home computer to make a listing (by identification letters) of my own family as to their names, letters and where they could be found in the various Hungate volumes. I used "Easy Script" word processor program. (errata references NOT listed!) Later, I began to add the names of those persons contributing to the Hungate "newsletter". Then I would find their names in the Volumes and add their family to my computer list.

I'm not sure just when I decided to enter ALL the lettered Hungate names from all the volumes and journals, but I'm sure my wife, Pat, knows!!! So nine months and 150 pages later, the first draft of the HUNGATE VOLUME INDEX was complete. That was in July of 1987. The capacity of a file was 750 lines, so soon I was dividing my file in two, then those in two, etc. Each of my floppy disks held about 8 or 9 files. The completed index was on 8 disks and contained 170 printed pages using Courier New 12 Font. (might be a GUINNESS record for the C64--!!) Files were then all combined into Word Perfect 6.0 on an IBM compatible computer. On June 5th, 2000 I converted the files to MS Word 2000 running on Windows 98 and printed on an HP LaserJet 5L printer. Today it's Windows 7 and Kodak printer. File name is now: C:\01\01HISTORIAN\2013 VOLUMES INDEX full for printing, with V13 no 3.doc The file contains 289 pages in Courier New 11pt Font (which must be used in order to maintain the correct format and alignment). I DEDICATE THIS INDEX TO THOSE HUNGATE DESCENDANTS WHO HAVE

CODENAMEBORN-DIED STATE VOLUME REFERENCE

GONE BEFORE US!! And to my wife, Pat McQueary Hungate (whose family meets world wide) and to our children; Dawn, Pamela, Cheryl, Lori, Nanette, Thomas, Teresa and Christopher; and grandchildren Jennifer, Sarah, Jeffrey, Leah Anne, Teresa, Rachel, Will, Mark, Jessica (b. 1/30/95, d. 11/13/99), Brianna, Bailey, Jacob, Liam, Caleb, Olivia, Max & Hannah.

note: Expect to update yearly, if possible. All rights to copies of this index are given to the HUNGATE FAMILY HISTORICAL SOCIETY, Inc. which is a 501(c) (3) Corporation and qualifies as a Non-Profit tax exempt corporation.

2014 Special Note: the HUNGATE FAMILY HISTORICAL SOCIETY corporation was discontinued in 2014 (see V13 #4--1-11) and a final volume was issued, named 'The Hungate Journal COMMEMORATIVE ISSUE FINAL EDITION, hereafter in this index, referred to as V13 #4. For 'Table of Contents' see V13 #4—iii.

PLEASE READ: SPECIAL CONDITIONS FOR THE INDEX OF THE HUNGATE VOLUMES

Because of the extrapolations from Commodore 64 to Word Perfect to MS Word, much of the original blocking (indentation, name connects, spouse location & more, especially the listed Volumes) has been lost, but the index still has some valuable use in the resultant form. An attempt to fix the unacceptable positioning has been made. I ask your understanding in this matter. Thank you. Tom

It contains the first, middle and last name of male Hungates, or the first, maiden and married name of the female Hungates. Subsequent non-Hungate lineage may only contain the first name of the male.

(* = adopted or step child)

In parenthesis () can be found a war record, Hungate society officer, or sometimes the wife or husband of an entry who has passed on or is in direct correspondence with the society. Only the year of the birth and death are listed and the two letter abbreviation of the latest state in which the entry resides, or was buried in.

The "Hungate" lineage for a female's married name is followed, in most cases, for 3 generations in the official publications. However, it is possible that additional information may be available upon special request. (one could search the genealogy of the married name for more information, also.) More complete dates and information can be found by going to the Hungate volumes referenced for most of the entries.

Literally hundreds of hours have been spent trying to identify correctly the location of each Hungate descendant. However, I'm sure that there are a few locations missing, or incorrect. If you would be so kind as to call these to my attention, I will correct them for the next update.

With this explanation in mind then, then, I trust that you will find this index both helpful and interesting in your quest for knowledge of our HUNGATE ancestry.

THOMAS EDWIN HUNGATE
